GROUP

THE PROBLEM

We want to differentiate ourselves as a company.

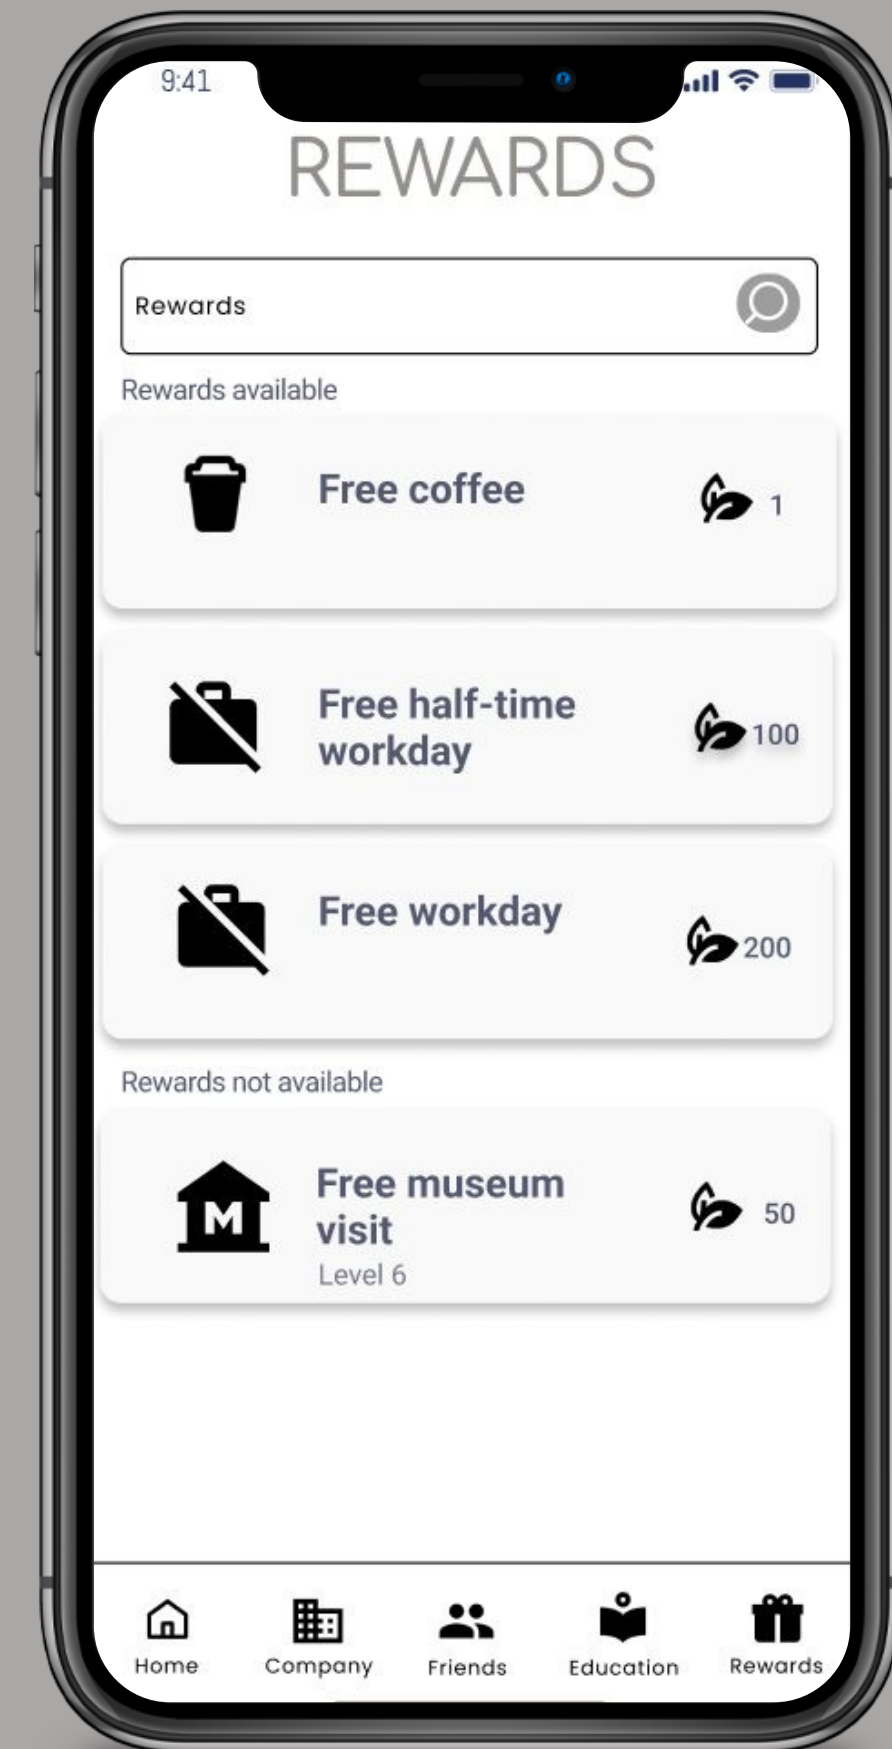

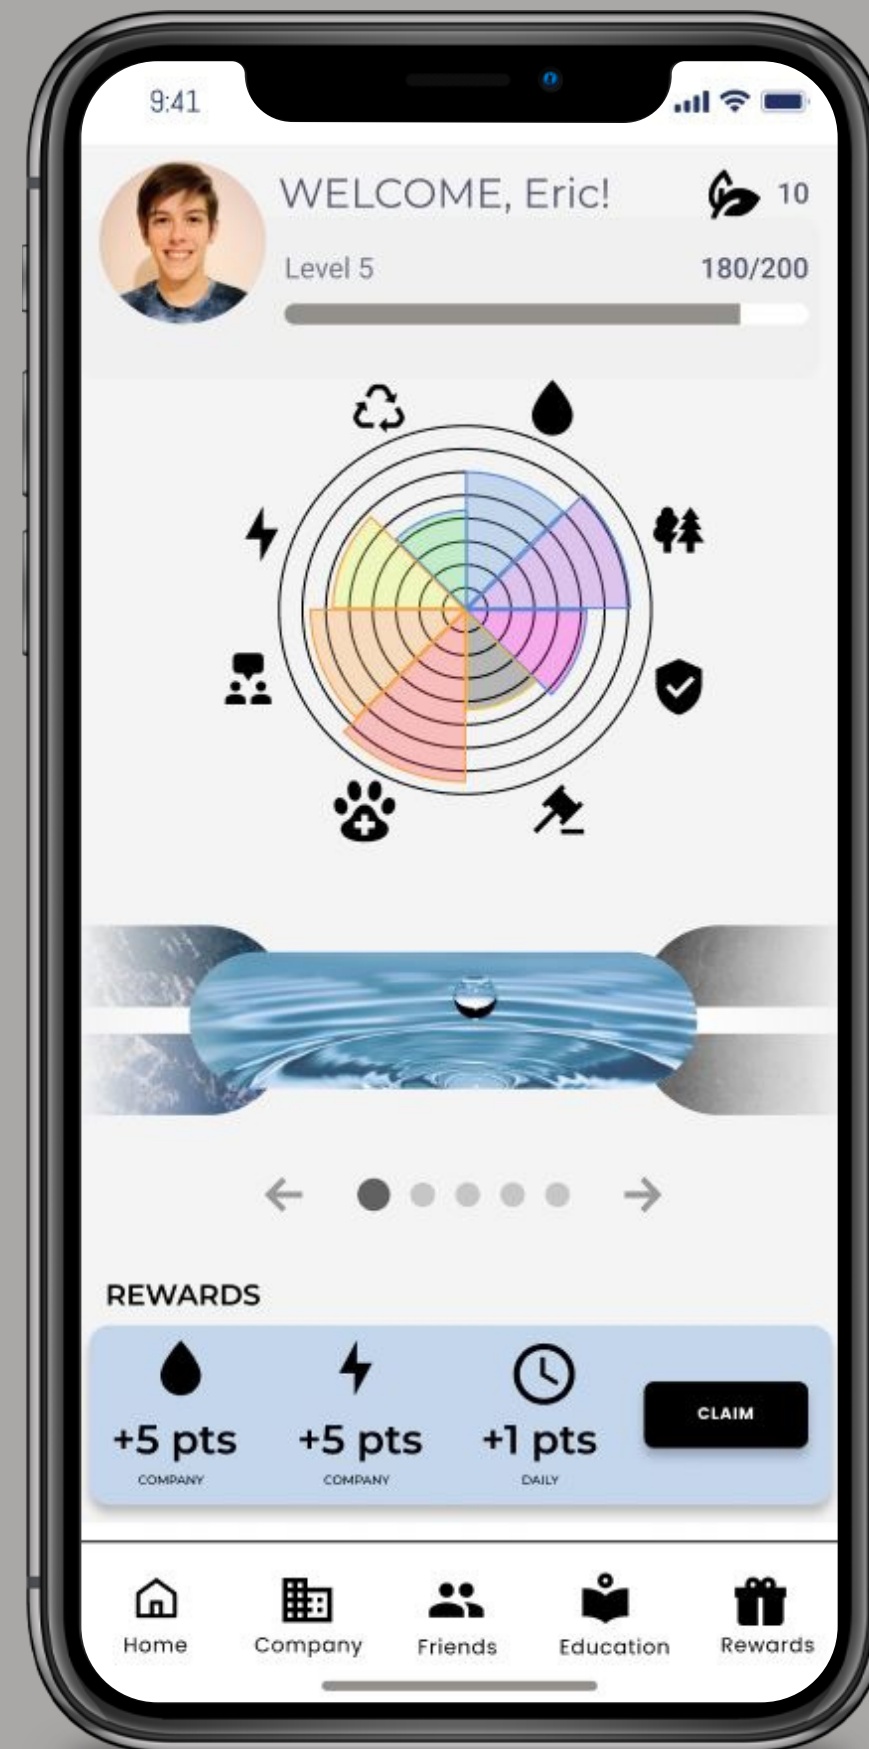

Our employees make important decisions every day to improve sustainability in our company.

To raise awareness among our employees...

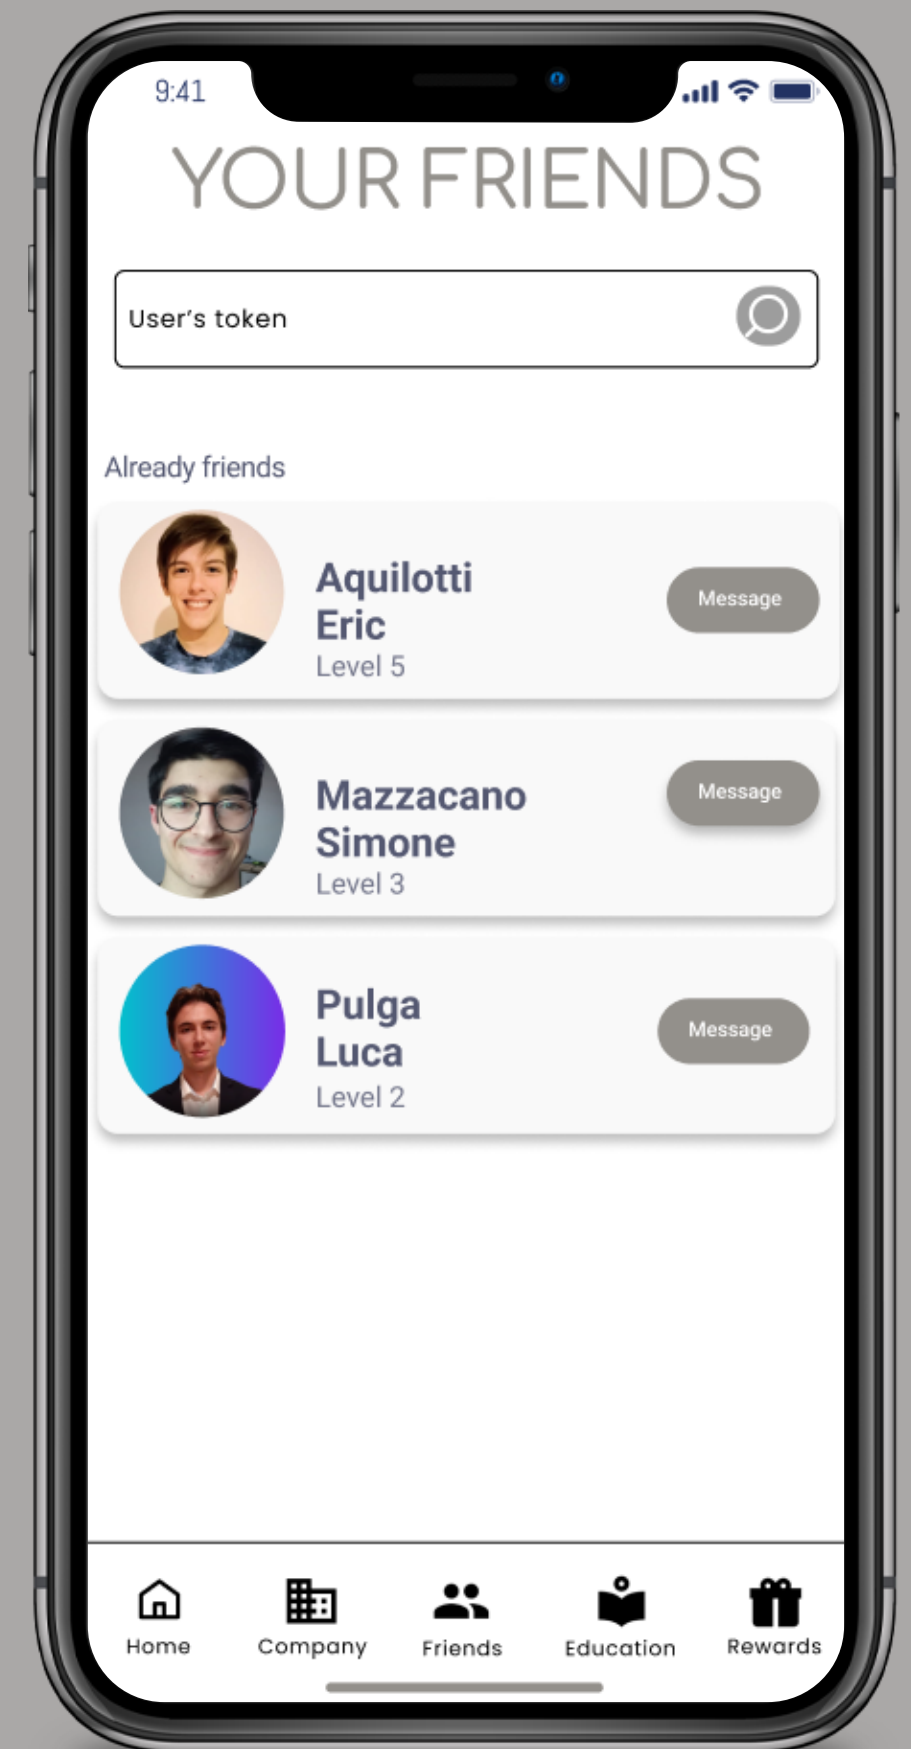

HAVE FUN BEING SUSTAINABLE

Level-up
improve your score
Gain eco-point
Win rewards helping the enviroment

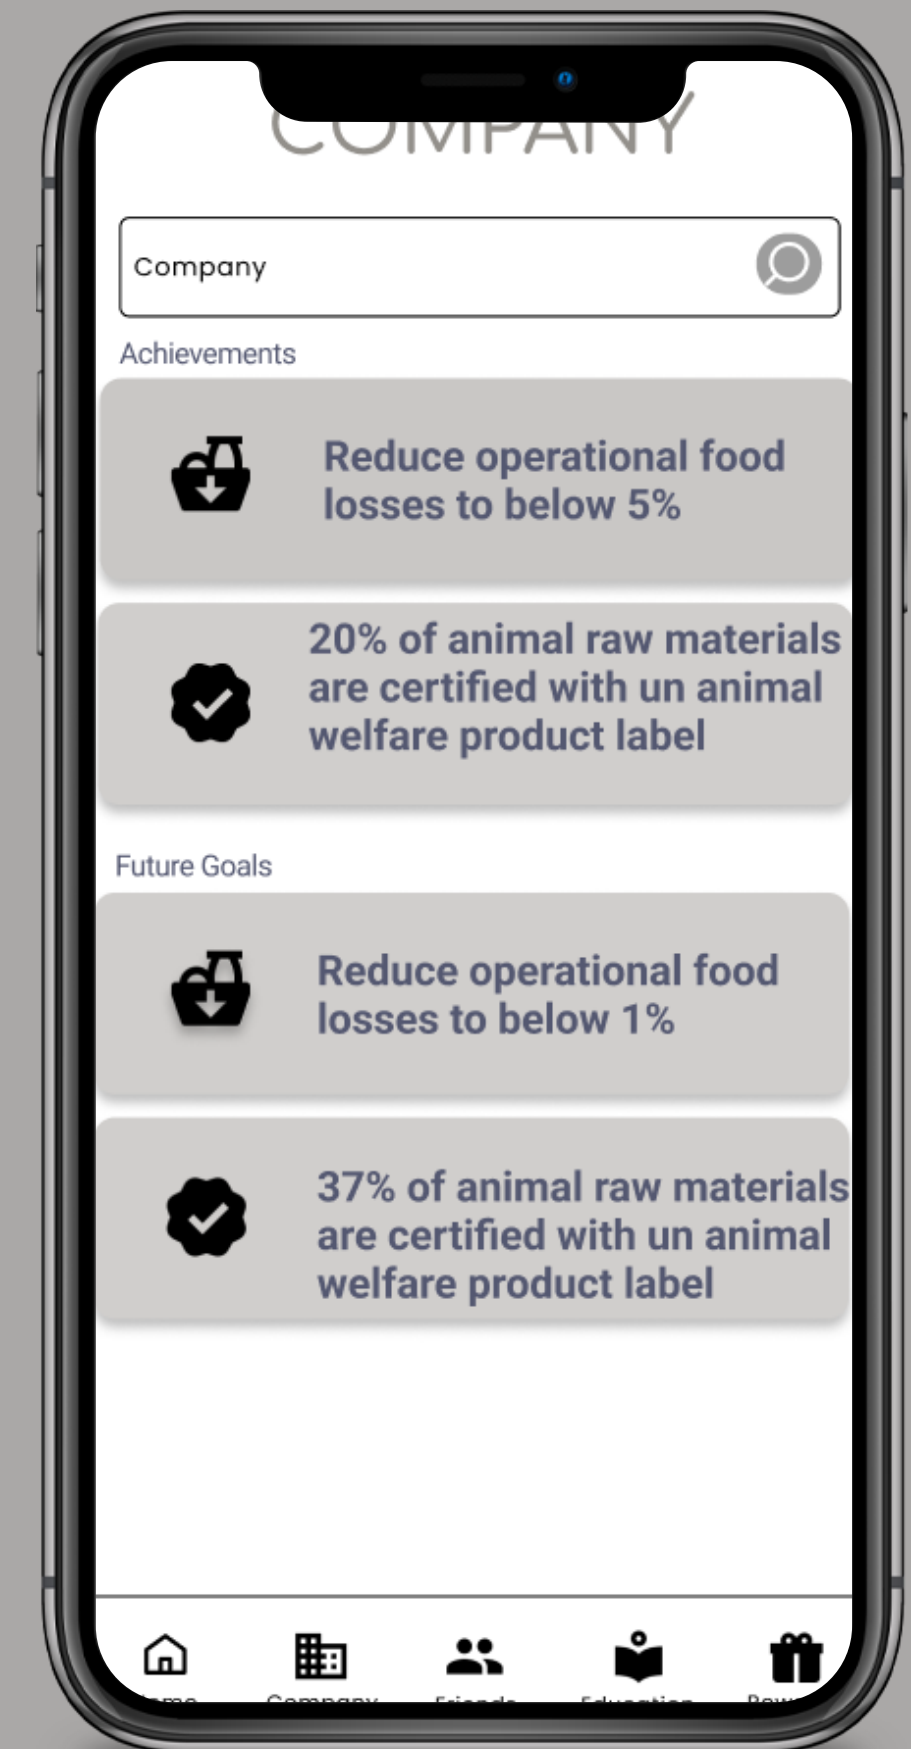

Create your own community and start a sustainable competition with your friends

See and compete with your colleagues ranked in your friends dashboard and try to beat their score

Monitor the company's future goals and try to help it to achieve them to gain more eco-points

The company is a special user
that shares his achievements
with all the employees by giving them extra eco-points.

CREATE A HAPPY ENVIRONMENT

Where everyone feels **part of the group**.

If **everyone** gets **rewards** for the improvement of the company
it will be stimulated to do more
and
will be happy to help with his work too!
